Types of Animals

Main Theme

Animal types and classification

Objectives and Tasks

Learning Objectives

1. Differentiate between living and non-living beings.
2. Identify the basic characteristics of living beings.
3. Classify animals as vertebrates or invertebrates.

Teaching Tasks

- Identify each animal and classify it based on its characteristics.

Interdisciplinary Relations

- **Natural Sciences**: Animal classification.
- **Language and Literature**: Promoting specific vocabulary.
- **Technology and Digital Competence**: Using digital tools for classification.
- **Art Education**: Representing animals creatively.

Resources and Materials

Physical Resources

- Computer, laminated sheets/scenarios, Artec blocks or similar.

Digital Resources

- PowerPoint presentation or similar about types of animals.

Session Structure

Introduction (5 minutes)

- Brief explanation of the activity and review of the content to be worked on.

Development (30 minutes)

- Represent different animals using Artec blocks or similar materials.
- Classify animals into their corresponding groups based on their characteristics.

Closure (10 minutes)

- Review and reflective questions about the activity.

Expected Outcomes

Key Learnings

- Learn to classify animals based on their characteristics.
- Develop fine motor skills.

Additional Notes

Possible Extensions

1. Extend classification with more specific groups (mammals, birds, reptiles, amphibians, etc.).
2. Classify using references to different animal kingdoms.
